RAYCO STUMP GRINDERS TRULY UN-STUMPABLE!

Acquired by Morbark LLC in 2017, Rayco was founded in 1978 in Wooster, Ohio by John M. Bowling who identified the unique need of the tree and landscape industry and began to build equipment to meet and surpass those needs.

Starting with the original RG 145 stump grinder, Rayco has grown into one of the most recognisable names in the business. With a range including self-propelled or tow-behind, to remote control or compact stump grinders with the versatility of handle any stump cutting job.

The introduction of Rayco stump grinders is the first step in Timberwolf's partnership with the Morbark range of brands and it represents a very exciting step for the European Arb sector.
